## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest the claimed semiconductive type pressure sensor, in particular the semiconductive pressure sensor having the recited combination of *a non-single-crystal-silicon-based substrate*, a movable insulating diaphragm, piezoresistor positioned on the insulating diaphragm; an insulating supporter positioned on the non-single-crystal-silicon-based substrate for fixing two ends of the insulating diaphragm and for forming a cavity between the insulating diaphragm and the non-single-crystal-silicon-based substrate, and a control circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record on the attached PTO Form 892 and not relied upon is considered pertinent to applicant's disclosure.
